BIOPOOL G

degreasing enzyme for removing grease, mucus, biofilm in swimming pool water

ADVANTAGES:

- Keeps the pool wall clean.
- Decomposes organic matter from the pool.
- Removes the fat strip.
- Prevents chloramine formation (with chlorine-based disinfectant).
- Environmentally friendly, non-toxic, biodegradable.

PACKAGES:

- 0,5 kg bottle,
- 1 kg bottle,
- 5 kg can,
- 10 kg returnable can

dinax®

LONGLIFE
CHLORINE FREE WATER TREATMENT FOR LONG LIFE

Degreasy enzymatic purifying gel for removing grease, mucus, biofilm in swimming pool water.

Requires 1 month to produce its effect. It reduces the foaming of pools, sparkling tubs, increases filtration performance and improves bacterial status.

We recommend it mainly for swimming pools with large bathing load (eg jacuzzies, adventure pools, training pools). Precede chloramine formation.

Non-toxic and biodegradable.

DOSAGE:

For first use:

Add 20 ml of liquid per 1 m³ of pool water to the equalizer tank or skimmer.

For continuous use:

By hand: Fill 10 ml/m³ of BIOPOOL-G fluid once a week in the equalizer tank or skimmer.

With a metering pump: feeds 0.1-1.0 ml/m³/h, all day, depending on the degree of greasing.

Maximum dose: 24 ml/m³

Bath water intended for community use treated with the product must comply with the establishment and operation of public baths 37/1996 (X. 18.) NM decree on public health conditions.

The product complies with Regulation 5/2023 on drinking water quality requirements and inspection procedures. (I.12.) of the provisions of the Government Decree. Registration number: 52289-3/2023/KTEF
