

DINAX COVER CLEANER F

calcium deposit remover (liquid)

APPLICATION:

For removing calcium deposits from pool covers, shutters, covers, stone slabs, stainless and other shiny surfaces.

Spray or sponge up 1 liter of **DINAX® COVER CLEANER F** per 10 m² on the surface to be cleaned.

Let it work for 1-2 hours. Make sure that the surface does not dry out. Rinse the surface with a high pressure water jet.

After the treatment, it may be necessary to raise the pH. The pool can be used immediately after the treatment described above.

RECOMMENDED FREQUENCY:

Optionally, but at least twice a year.

PACKAGE:

1 kg

STORAGE:

Keep container in a dry, cool place.
Keep unused containers closed.
