

ANTISCALE GW

Surface scale remover gel, cleaner

USE:

The product is gel-like liquid used to remove scale from the surface of acrylic hot tubs, film-, tile- or mosaic covered swimming-pools as well as from tile-covered walls.

It is also suitable for the scale removal from chromium-plated steel surfaces or by using a CIP pump, it can be used on heat exchangers as well.

USE:

Apply the product onto the surface to be treated with the help of a sponge.

Generally, if applied as a thin layer, 1 kg of **DE-VÍZKŐ GW** is enough for treating approx. 10-15 m² scaled surface. Depending on the thickness of limescale, repeat the process.

The product has limited impact on iron or manganese precipitates as well. Wait 5 to 20 minutes after wetting the surface, then rinse it with clean water.

Before treating the surfaces, do a trial cleaning at a surface out of sight. To avoid skin irritation, wearing safety gloves and goggles is compulsory.

During treatment, no bathers are allowed to use the pool. Before using the pool again, ensure the thorough rinse of the surfaces getting in contact with the product.

Available as: 1 kg plastic bottle, 10 kg reusable container
