

ALGAE ELIMINATION

CHLORALGIN

algae-growth inhibitor

**APPLICATION:**

For residential and professional use.

PACKAGES:

- 1 kg
- 3 kg
- 5kg
- 20 kg returnable can

STORAGE:

in a cool, dry and frost-free place in its original packaging

STATE OF MATTER:

liquid

OTH LICENSE NO.:

KEF-17337-4/2015

APPLICATION:

An algaecide for use alongside chlorine disinfectants.

- not dilutable
- prevents the growth of algae
- biodegradable
- is a necessary part of the water disinfection process.
- for use with chlorine disinfectants only

It is not recommended for the treatment of green water due to algal blooms or algae growth, as the product is primarily a preventive measure.

DOSAGE:

Starter dose:

- 100 ml CHLORALGIN per 10 m³ of pool water (10 ml/m³)

Continuous dosage:

10 m³ of pool water once a week:

- for indoor swimming pools: 40 ml (4 ml/m³)
- for outdoor pools: 60 ml (6 ml/m³)

Continuous daily or less frequent dosing is not recommended due to the development of resistance. A weekly dosing schedule is preferable, if no problems are encountered, a 2-weekly dosing schedule may be used.
